PROFESSIONAL SUMMARY

Java Backend Developer with production internship experience delivering **100+ RESTful APIs** using Core Java, Spring Boot, and Spring Security. Experienced in secure authentication and authorization (JWT, OTP, RBAC), payment gateway integration, real-time messaging, and Redis-backed asynchronous processing over PostgreSQL. Strong in layered architecture, concurrency-safe transactional workflows, database optimization, and Agile SDLC delivery.

TECHNICAL SKILLS

Languages & Frameworks	Java, SQL, Spring Boot, Spring Security, Hibernate
Databases	PostgreSQL, MySQL, Redis, Flyway
Testing & Tools	JUnit 5, Mockito, Postman, Swagger / OpenAPI, Docker, Git, GitHub, Gradle, Maven
Concepts	REST API Design, JWT, System Design, Agile

PROFESSIONAL EXPERIENCE

DeepLure Research Pvt Ltd — Backend Engineer Intern May 2026 – Present

Java · Spring Boot · Spring Security · PostgreSQL · Redis · Docker

- Designed and shipped **100+ production REST APIs** in Spring Boot across a B2B marketplace and an on-demand services platform, covering authentication, catalogue, orders, payments, and partner/admin modules.
- Implemented secure authentication and authorization using **JWT and role-based access control (RBAC)**, with OTP verification delivered over SMS and email.
- Integrated the **Razorpay payment gateway** for orders, wallets, and refunds, applying **idempotency keys and optimistic/pessimistic locking** to prevent double-charges and race conditions under concurrent requests.
- Built real-time chat and support ticketing over **WebSocket/STOMP**, with Firebase Cloud Messaging push notifications and third-party SMS integration.
- Engineered **Redis-backed asynchronous workers** for notifications, payment reconciliation, and booking expiry, and reduced database load **~40%** through Redis caching and query optimization.
- Modeled normalized PostgreSQL schemas with **Hibernate/JPA and versioned Flyway migrations**; wrote unit and integration tests with JUnit 5 and Mockito, and contributed in Agile sprints through code reviews, debugging, and production defect resolution across the SDLC.

SmartBridge Educational Services (APSCHE) — Data Analytics Intern May 2025 – Jul 2025

- Cleaned and transformed toy-manufacturing sales datasets using SQL joins, filters, and aggregate queries, and built 3 Tableau dashboards for state-level production and inventory review.

PROJECTS

Flight Booking System Aug 2025 – Jan 2026

Spring Boot · Spring Security · MySQL · Redis · Docker | [GitHub](#)

- Developed **14+ REST APIs** for flight search, booking, cancellation, and authentication using layered architecture (Controller → Service → Repository) with JWT and role-based access control.
- Implemented **concurrency-safe seat allocation with transactional rollback** on cancellation, preventing overbooking and inventory drift under parallel requests.
- Added **Redis caching** for search results, containerized the service with **Docker**, documented all endpoints with Swagger UI, and applied centralized exception handling across the API.

User Management System Oct 2024 – Dec 2024

Spring Boot · Hibernate/JPA · MySQL | [GitHub](#)

- Built a CRUD REST API with dynamic search and filtering, request validation, and centralized exception handling.
- Modeled a normalized 6-table relational schema in MySQL with Hibernate/JPA entity mappings, and tested and documented all endpoints in Postman.

EDUCATION

Sri Venkateswara College of Engineering, Tirupati 2022 – May 2026

B.Tech, Electronics & Communication Engineering **CGPA: 8.5 / 10**

CERTIFICATIONS

Oracle Cloud Infrastructure Foundations Associate — Oracle (Sep 2025) · **Problem Solving, Intermediate** — HackerRank (Apr 2026) · **SQL, Intermediate** — HackerRank (Mar 2026) · **Java Programming** — GeeksforGeeks (Mar 2026)

ACHIEVEMENTS

- Built a Spring Boot backend for a Learning Management System at **Design Spark Challenge 2026**, a 48-hour innovation marathon hosted by Ratan Tata Innovation Hub (RTIH), Andhra Pradesh.
- Solved **100+ Data Structures & Algorithms** problems on LeetCode.
