PROFESSIONAL SUMMARY

Backend Engineer with production experience delivering **100+ RESTful APIs** using Core Java, Spring Boot, and Spring Security. Experienced in secure authentication and authorization (**JWT, OTP, RBAC**), payment gateway integration, real-time messaging, and Redis-backed **asynchronous processing** over PostgreSQL. Strong in layered architecture, **concurrency-safe** transactional workflows, database optimization, and Agile SDLC delivery.

TECHNICAL SKILLS

Languages & Frameworks	Java, SQL, Spring Boot , Spring Security, Hibernate
Databases	PostgreSQL, MySQL, Redis, Flyway, Apache Kafka
Testing & Tools	JUnit 5, Mockito, Postman, Swagger, Docker, Git, GitHub, Gradle, Maven
Concepts	REST API Design, JWT, System Design, Microservices, Event-Driven Design, SDLC, Agile, Scrum
Cloud & DevOps	Linux, AWS (IAM, EC2, VPC , S3, EBS, Auto Scaling), Docker, GitHub Actions (CI/CD)

PROFESSIONAL EXPERIENCE

DeepLure Research Pvt Ltd — Backend Engineer Intern

May 2026 – Aug 2026

Java · Spring Boot · Spring Security · PostgreSQL · Redis · AWS S3 · Docker

- Designed and shipped **100+ production REST APIs** in Spring Boot across a B2B marketplace and an on-demand services platform, covering authentication, catalogue, orders, payments, and partner/admin modules.
- Implemented secure authentication and authorization using **JWT** and **role-based access control (RBAC)**, with OTP verification delivered over SMS and email.
- Integrated the **Razorpay** payment gateway for orders, wallets, and refunds, applying idempotency keys and optimistic/pessimistic locking to prevent double-charges and race conditions under concurrent requests.
- Built real-time chat and support ticketing over **WebSocket/STOMP**, with **Firebase Cloud Messaging** push notifications and third-party SMS integration.
- Engineered **Redis-backed asynchronous workers** for notifications, payment reconciliation, and booking expiry, and reduced database load **~40%** through Redis caching and query optimization.
- Modeled normalized **PostgreSQL** schemas with Hibernate/JPA and versioned Flyway migrations; wrote unit and integration tests with **JUnit 5** and **Mockito**, and contributed in Agile sprints through code reviews, debugging, and production defect resolution across the SDLC.

SmartBridge Educational Services (APSCHE) — Data Analytics Intern

May 2025 – Jul 2025

- Cleaned and transformed toy-manufacturing sales datasets using SQL joins, filters, and aggregate queries, and built 3 Tableau dashboards for state-level production and inventory review.

PROJECTS

Flight Booking System

Aug 2025 – Jan 2026

Spring Boot · Spring Security · PostgreSQL · Redis · Apache **Kafka** · Docker · GitHub Actions | [GitHub](#)

- Refactored a monolithic Spring Boot backend into **4 independently deployable microservices (Auth, Flight, Booking, Notification)**, each with its own Spring Boot application, PostgreSQL database, and Flyway migrations.
- Implemented REST-based inter-service communication** — the Booking Service calls the Flight Service to reserve seats, forwarding the original JWT so each service independently authenticates and enforces role-based access for user and admin roles.
- Built an event-driven notification flow with **Apache Kafka**: the Booking Service publishes a booking-created event on successful booking, consumed asynchronously by a dedicated **Notification Service**, decoupling notifications from the booking transaction.
- Containerized each service with multi-stage **Docker** builds, configured a GitHub Actions CI pipeline for Gradle build/test, and hardened the APIs with **Jakarta Bean Validation**, centralized exception handling, and JUnit 5/Mockito test coverage; retained Redis caching in the Flight Service.

User Management System

Oct 2024 – Dec 2024

Java · Spring Boot · Hibernate/JPA · MySQL | [GitHub](#)

- Built a CRUD REST API with dynamic search and filtering, request validation, and centralized exception handling.
- Modeled a normalized 6-table relational schema in MySQL with Hibernate/JPA entity mappings, and tested and documented all endpoints in Postman.

EDUCATION

Sri Venkateswara College of Engineering, Tirupati

2022 – May 2026

B.Tech, Electronics & Communication Engineering

CGPA: 8.5 / 10

CERTIFICATIONS

Oracle Cloud Infrastructure Foundations Associate — Oracle (Sep 2025) · Problem Solving, Intermediate — HackerRank (Apr 2026) · SQL, Intermediate — HackerRank (Mar 2026) · Java Programming — GeeksforGeeks (Mar 2026)
